

How do I back up and restore my MS-SQL database?

Article Number: 1 | Rating: 1/5 from 47 votes | Last Updated: Thu, Apr 23, 2015 at 10:03 AM

You can back up and restore your MS-SQL database by using the MS-SQL Web Data Administrator tool. You can access it by: Log into your eXtend Control Panel Click 'MS-SQL Web Data Administrator Tool' To back up your MS-SQL database: Select your MS-SQL database Click 'Backup' Download the .sql file To restore your MS-SQL database: Click 'Restore' Select your .sql file from your computer Click 'Upload' The MS-SQL Web Data Administrator Tool can only produce and restore .sql files. Â Please raise a Support Ticket with the Customer Services team if you have a .bak file from another MS-SQL server you need to restore from.
