**Do I need to back up my Managed WordPress website?**

Article Number: 1002 | Rating: Unrated | Last Updated: Mon, Nov 16, 2020 at 5:40 PM
Managed WordPress keeps 30 days' worth of backups for youÂ *automatically*Â — there's nothing you need to do to enable them. **Note:**Â Backups are only available forÂ **active**Â Managed WordPress plans. If the plan is removed due to failed billing, you will need to restore from local backups or contact support for additional options.
