

Access files in my Managed WordPress account

Article Number: 1025 | Rating: 1/5 from 3 votes | Last Updated: Mon, Nov 16, 2020 at 6:56 PM

There are many reasons you may need to access your WordPress files, such as installing a custom theme, editing a config file, or backing-up your website. Managed WordPress includes a File Browser so you can view, upload, download, move and edit your WordPress files without using FTP. The tool also includes several more advanced features. Go to your Heart Internet [control panel](#) and open the Managed WordPress product page. Under **Managed WordPress**, next to the hosting account you want to use, select **Manage**. In the row of tabs near the top of the page, select **Tools**. In the **File Browser** box, select **Open**.
