

View my IP address

Article Number: 1034 | Rating: Unrated | Last Updated: Mon, Nov 16, 2020 at 7:01 PM

If you have to manually update the DNS for your domain to point to your hosting, here's how to find the IP address for your Managed WordPress site. Go to your Heart Internet [control panel](#) and open the Managed WordPress product page. In your **My Products** page in the **Managed WordPress** section and next to the site you're going to work with, select **Manage**. At the top of the page select **Settings**. In the **Production Site** section, select **Show more**. The IP address appears under **IP address**.
