

<b>Restore my site</b>	
Article Number: 1041   Rating: Unrated   Last Updated: Mon, Nov 16, 2020 at 7:33 PM	
<p>Managed WordPress accounts offer 30 days' worth of backups for your WordPress installation's files and database. You can select to restore your files, your database, or both. <b>Warning:</b> All changes made after the selected backup date will be lost. For example, if you restore your database, items like sales records, posts, and comments written <i>after the backup date you select</i> will be erased. Go to your Heart Internet <a href="#">control panel</a> and open the Managed WordPress product page. In the <b>Managed WordPress</b> section, select <b>Manage</b> next to the site you want to restore. From the menu at the top, select <b>Backups</b>. In the <b>Select restore type</b> list, choose the type of backup to restore and select a date for each type:</p>	
<b>Choose:</b>	<b>If this happened:</b>

- 1.
2. Select **Restore**.
