

Change a theme in WordPress

Article Number: 1059 | Rating: 1/5 from 4 votes | Last Updated: Wed, Nov 18, 2020 at 8:52 PM

Changing your WordPress theme enables you to change much about how your website is displayed. Log in to WordPress [Install a theme](#) if the theme you want to use has not yet been installed. From the **Appearance** menu, click **Themes**. Hover over the theme you wish to activate. Click **Activate**. Your new theme will now be live on your WordPress site.
