

Import WordPress comments into Disqus

Article Number: 1068 | Rating: Unrated | Last Updated: Wed, Nov 18, 2020 at 8:53 PM

Once you have created your Disqus account and have [installed the plugin](#) you can import any of your existing comments into Disqus. By default, any new comments will automatically be imported to Disqus. Log in to WordPress. Go to **Comments > Disqus**. Click **Plugin Settings** in the upper right corner. In the **Import and Export** selection, click the **Export Comments** button. This will queue up your comments to be imported into Disqus.
