

Change the theme background color in WordPress

Article Number: 1086 | Rating: 1/5 from 3 votes | Last Updated: Wed, Nov 18, 2020 at 9:21 PM

The background color of a WordPress site can be changed by modifying the CSS. Before making any changes to a WordPress theme,Â [add a child theme](#). [Log in to WordPress](#). Go toÂ **Appearance > Editor**. Enter the CSS to change the background color. Below is sample code:

```
.site {  
    background-color: #XXXXXX;  
}
```

.siteÂ is the css class for the whole site. **XXXXXX**Â is the hex code for the color you want to use. ClickÂ **Update File**.
