Setup Contact Form 7 in WordPress

Article Number: 1089 | Rating: Unrated | Last Updated: Mon, Nov 16, 2020 at 8:57 PM

Contact Form 7 is a popular WordPress plugin for adding a contact form to your site. You need to complete a basic setup before it can be added to your page. InstallÂ the Contact Form 7 plugin ActivateÂ the plugin On the left navigation bar, clickÂ **Contact** ClickÂ **Add New**Â button if you are creating a new form **Note:**Â If you want to update an existing form instead, click theÂ **Edit**Â link below your existing form. Click theÂ **Mail**Â tab Enter a Title for your form Update theÂ **To**Â field to the email address where you want the form to send If necessary, update theÂ **From**Â address to an email address with the same domain name as the hosting **Note:**Â If the From address does not match the domain on the hosting account, then the server will prevent the mail from being received. ClickÂ **Save Next Steps** After the initial setup you canÂ add the contact form to your site.
