

## Change which comments require moderation in WordPress

Article Number: 1113 | Rating: 1/5 from 3 votes | Last Updated: Mon, Nov 16, 2020 at 10:10 PM

You can configure WordPress to automatically mark comments to be moderated based on keywords, names, URLs, email address or IP addresses that you specify. This is an effective way to help prevent comment spam. Log in to WordPress. Go to **Settings** > **Discussion** Locate the **Comment Moderation** section Enter any of the following into the box, one item per line:

Keywords or phrases Domains or URLs Names Email addresses IP addresses Scroll to the bottom of the page, and click **Save Changes**. Log into a test user and try to submit a comment that includes something you marked for moderation in your settings.
