Disable comments on old posts in WordPress

Article Number: 1119 | Rating: Unrated | Last Updated: Mon, Nov 16, 2020 at 10:11 PM

You can prevent users from commenting on old WordPress pages and posts as a way to help prevent comment spam. Log in to WordPress. Go toÂ **Settings**Â >Â **Discussion** Locate theÂ **Other comment settings**Â section Check the box next to the line stating, "**Automatically close comments on articles older than XX days"** On the same line, change the Day setting to the number you prefer Scroll to the bottom of the page, and clickÂ **Save Changes**. After making the above changes, users will not be able to comment on any pages or posts after the number of days you specified.
