

Disable comments for a single WordPress post

Article Number: 1128 | Rating: Unrated | Last Updated: Mon, Nov 16, 2020 at 10:13 PM

Within WordPress you can disable comments for a single post, instead of disabling them for the entire site. Disabling comments can help prevent comment SPAM. Log in to WordPress. Click **Posts** Click **Edit** for the Post you wish to modify Click the **Screen Options** menu in the top-right corner Check the box next to **Discussion** Scroll down to the newly added **Discussion** section Uncheck the "Allow Comment" box Click **Update**
