

Change your WordPress password in the Dashboard

Article Number: 1134 | Rating: 1/5 from 2 votes | Last Updated: Mon, Nov 16, 2020 at 10:14 PM

You can update your WordPress password from within the Dashboard. You must know your current password to use these steps. Log in to your WordPress Dashboard. Select **Users** then **All Users** from the main menu. Locate your username in the list and click on it. On the **Profile** page, click on *Generate Password*. Enter your new password, or make note of the automatically generated. **Note:** Please remember that your website's security is only as good as your password strength. Click the **Update Profile** button. Your new password should work immediately.
