

Evaluate site performance with PageSpeed Insights

Article Number: 1227 | Rating: Unrated | Last Updated: Tue, Nov 17, 2020 at 6:53 PM

You can use Google Developer's PageSpeed Insights to analyze the load time of your website. Go to Google Developer's [PageSpeed Insights tool](#). Enter your domain where it says "**Enter a web page URL**". Click **Analyze**. View the results. In the results, you can see suggestions for improving both the desktop and mobile versions of your site. Pay special attention to any suggestions to optimize images, leverage browser caching, minify JavaScript or CSS, and render-blocking JavaScript and CSS.
