Add subdomain to Managed WordPress

Article Number: 1268 | Rating: 1/5 from 3 votes | Last Updated: Sat, Jun 26, 2021 at 9:06 AM

You can add domains or sub-domains to your Managed WordPress account through your control panel. Go to your Heart InternetÂ control panelÂ and open the Managed WordPress product page. From the Managed WordPress section selectÂ **Manage**Â for the site you want to use. In this control panel, open theÂ **Settings**Â tab at the top. In the Domains section, selectÂ **Attach Domain**. From the pull-down menu, selectÂ **Add an external domain or subdomain**Â or select a specific domain within your account. SelectÂ **Attach**Â to complete finish the process. **Note:Â** If you're using subdomains, you'll need to also add them in the domain controls for the primary domain. **More info** You can find information on setting up and using WordPress Multisite network in theÂ Multisite Support Documentation.
