Renewing my SSL Certificate

Article Number: 1333 | Rating: 1.4/5 from 9 votes | Last Updated: Wed, Dec 2, 2020 at 4:48 PM

When your SSL certificate isn't set to auto-renew, you have a 90-day window to purchase a renewal credit and apply it to the certificate. The window goes from 60 days before to 30 days after the expiration date. **Warning:** If you haven't completed the renewal by the expiration date, your website displays an error message and won't be accessible to your visitors. If you're using a Standard (DV) certificate with the primary domain for your account, and you've set the certificate to auto-renew, no further action is needed on your part. Renewing your SSL certificate is completely automated. For all other certificates, including certificates for an add-on domain, follow these steps. Go to your Heart Internet account. Select **SSL Certificates** and do one of the following for the certificate you want to renew: If the billing for your renewal is already completed, skip to the next step. If you don't have auto-renew, select **Renew** if you don't have auto renew. If you have auto-renew, select **Renew now**. Select the certificate you want to renew, select **Continue to Cart**, and complete the transaction for your renewal. If this was your primary domain and your site is hosted with us, you're done! We'll install your renewed certificate for you. If your site is hosted with a third party or this is for an add-on domain, you need to install the renewed certificate.
