

What If I notice a problem with an SSL?

Article Number: 1426 | Rating: 1/5 from 3 votes | Last Updated: Thu, Jun 9, 2022 at 10:28 AM

Secure certificates are targets for different types of attacks and malicious behavior. If you're concerned an attacker compromised a private key, someone is misusing a certificate, or you notice any other type of suspicious activity with a certificate, [contact us via ticket or Live Chat](#) orÂ **practices@starfieldtech.com**.
