

How do I create a MySQL database?

Article Number: 15 | Rating: 1/5 from 2 votes | Last Updated: Thu, Apr 23, 2015 at 10:41 AM

If MySQL databases are included in your hosting package, you can create MySQL databases by: Log into your eXtend Control Panel Scroll down to 'Web Tools' Click 'MySQL Databases' Enter in the username for the database Click 'Generate Password' to create a password for that username Click 'Create' The database will be created, with the same name as the username In the MySQL Databases section, you can also manage existing databases, create new database users, or delete databases if you no longer need them.
