

Import products with Product CSV Import Suite

Article Number: 1527 | Rating: Unrated | Last Updated: Mon, May 10, 2021 at 3:07 PM

Import products in your WooCommerce shop by using the Product CSV Import Suite extension. **Note:** In order to follow the steps below, make sure that the extension is active in your WooCommerce shop by navigating to **WooCommerce > Extensions** and clicking on the "Activate" button next to the plugin's name.

Create your CSV file The first step to import your products is to create a CSV file. [Download a sample here](#) or you can find one titled sample.csv in the plugin's folder. In the sample you'll find some common fields like *post_title*, *stock_status*, and *regular_price* among others, but there are more fields available that you can use. (Back to top.)

Import your CSV file Once you've created the CSV file, navigate to **WooCommerce > CSV Import Suite** and get started with the import by clicking on the **Import Product** button. (Back to top.)

Map the fields In the last step, you'll be asked to *map the fields*. This is to ensure that the headers of the CSV file correspond to the correct field in WordPress. **Note:** make sure that you take a moment to double-check the fields as this is the final step before the import starts. (Back to top.)
