

Export Data with the WooCommerce Customer/Order/Coupon CSV Export plugin

Article Number: 1530 | Rating: Unrated | Last Updated: Mon, May 10, 2021 at 3:08 PM

Below you'll find links with more information regarding how to export data manually, automatically, and how to use the predefined formats or create custom ones using the WooCommerce Customer/Order/Coupon CSV Export plugin. **Re** WooCommerce Customer/Order/Coupon CSV Export is a premium WooCommerce extension included with WordPress Ecommerce Hosting or as a standalone purchase. [Export data manually](#) You can export data manually at any time. In the section above you'll find more information about exporting data in bulk, from the Orders list, and from the Users list. [Export data automatically](#) You can create one or more automated exports to send customer or order export files on a recurring basis. In the section above you can check how to create an automated export, find more information about export schedules and how to setup export transfers via FTP, HTTP POST, Email, and locally. [Export formats](#) You can use one of the predefined formats to export your customers, orders, and coupons, or create multiple, custom export formats that can be used in your manual or automated exports. In the section above, you can find samples of how the CSV and XML format work when using the predefined templates, and instructions on how to create your own, custom format.
