

## Set the default shipping method in WooCommerce

Article Number: 1599 | Rating: Unrated | Last Updated: Wed, May 12, 2021 at 1:04 PM

You can set the default shipping method that will be selected at checkout for each shipping zone. **Required:** Ensure you have at least one **Shipping zone** set up before you begin. If not, set up a shipping zone first.

Click **WooCommerce** from the left-hand menu. Click **Settings** in the expanded WooCommerce menu. Click the **Shipping** tab. Edit the **Shipping Zone** by clicking the **Edit** link or the zone name. Reorder the **Shipping Methods** by dragging and dropping the shipping method. To do so, select and hold the three bars on the left-side of the shipping method name (local pickup, flat rate, or free shipping) and drag it up or down in the list. The default shipping method for that shipping zone will be the top, enabled method in the list.
