

## Manually set a subscription status

Article Number: 1608 | Rating: Unrated | Last Updated: Wed, May 12, 2021 at 1:14 PM

By default, new subscriptions have the *Pending* status. This means no future renewals are processed, and the customer will not receive special access to any products. However, once the subscription has a customer, billing schedule and line items, and recurring totals have been calculated, you can change the subscription's status to *Active*. **Required:** WooCommerce Subscriptions is a premium WooCommerce extension included with WordPress Ecommerce Hosting or as a standalone purchase. To change a subscription's status: Click the **Subscription Status** select box in the **Subscription details** meta box. Click the **status** you want to give the subscription. **Save Subscription**. Once a subscription is active, the customer added to the subscription
