Can I edit core WooCommerce fields with the Checkout Field Editor plugin?

Article Number: 1623 | Rating: 1/5 from 3 votes | Last Updated: Wed, May 12, 2021 at 1:35 PM

Certain default (or "core") checkout fields have aspects that cannot be edited by the Checkout Field Editor plugin. Th
fields are essential to WooCommerce's checkout functionality and help preserve compatibility with other plugins as w
This article will help you identify core fields and understand what you can and cannot modify from these default settir
Required: Checkout Field Editor is a premium WooCommerce extension included with WordPress Ecommerce Host
or as a standalone purchase. Core WooCommerce checkout fields are highlighted in purple in the Checkout Field Ec
settings: Aspects of these fields that cannot be modified will show dashes instead of customizable fields in the table
the settings page (e.g. billing_postcode shown above). You're unable to edit: Core field names Field type for certain
address fields Validation rules for fields that change based on customer country Â With these concerns in mind, so
core fields can be edited in the following ways: Changing field labels or positions Disabling fields by checking their
boxes and selecting **Disable/Remove** Re-enabling disabled fields by checking their boxes and selecting **Enable**
