What column headers can I use with the Product CSV Import Suite?

Article Number: 1674 | Rating: Unrated | Last Updated: Wed, May 12, 2021 at 3:07 PM
The Product CSV Import Suite accepts an extensive list of column headers that you can include in your CSV to import products and variations. Column headers are case sensitive and should match exactly. **Required:** Product CSV Import Suite is a premium WooCommerce extension included with WordPress eCommerce Hosting or as a standalone purchase. Here's a list of most common fields that are imported: post_title post_name post_status sku downloadable virtual visibility stock stock_status backorders manage_stock regular_price sale_price weight length width height tax_status tax_class tax:product_type tax:product_cat tax:product_tag tax:product_brand attribute:Color attribute_data:Color attribute:Size attribute_data:Size For an extensive list of column headers, including descriptions and example, see [WooCommerce's Column Header Reference](#).
