

## Get started with the Local Pickup Plus plugin

Article Number: 1710 | Rating: Unrated | Last Updated: Wed, May 12, 2021 at 4:11 PM

In this series of articles, you'll find out more about setting up and utilizing the Local Pickup Plus plugin to setup a way for your customers to choose a physical, pickup location for your products. You can also setup scheduled appointments and update the availability of your stock through your online store. Get started with the series of articles below: **Required:** Local Pickup Plus is a premium WooCommerce extension included with WordPress Ecommerce Hosting or as a standalone purchase. **Configure the plugin settings** As a first step, you'll learn more about enabling the local pickup option in your shop, change how pickup locations display on the checkout, and set your availability for pickup appointments. **Understand how to use the lead time** Next up, you can read about lead time and how you can use it to ensure that your customers can schedule their preferred pickup appointments. **Set up the product pickup settings** Configure a product or category's availability for local pickup plus in your shop. **Enable and set up geocoding** Lastly, you can use geocoding to allow for the pickup locations list to be sorted automatically in relation to the customer's current location (using geoIP).
