

Merge Products and Variations with the Product CSV Import Suite

Article Number: 1734 | Rating: Unrated | Last Updated: Wed, May 12, 2021 at 4:23 PM

Learn how to merge changes to your current products and variations with an updated CSV. **Required:** Product CSV Import Suite is a premium WooCommerce extension included with WordPress Ecommerce Hosting or as a standalone purchase. . Create a CSV, or alter an existing CSV. To make sure changes are mapped to the correct location, include one of the following columns: **post_id** and/or **sku** Navigate to **WooCommerce > CSV Import Suite** and click **Merge Products** or **Merge Variations**. Choose your CSV from your computer or enter a path to the file. Adjust the delimiter or leave as-is (optional). Merge empty cells. If this is not selected, then empty cells will be ignored when importing things such as attributes (optional). Click **Upload file and import**. Map the fields for your products and/or variations. Click **Submit** to merge your products and/or variations. **Note:** â€¢ Merging new data into already existing product data will **overwrite the older data**. To keep any existing data, the data will need to be in the document to be merged, [as shown in this WooCommerce example](#). â€¢ Merging downloadable products doesn't automatically grant access for customers who have previously purchased those products.
