

How do I transfer my .uk domain to Heart Internet?

Article Number: 177 | Rating: 2.1/5 from 12 votes | Last Updated: Thu, Apr 23, 2015 at 11:23 AM

Transferring your .uk domain name is a simple process. It is free to transfer a .uk domain name into Heart Internet, and, provided you change the IPSTAG correctly, should occur almost instantaneously. To transfer your domain name: Change the IPSTAG of your domain name to HEARTINTERNET or EXTEND. Your domain registrar should allow you to do this via their control panel. Some may also charge to transfer out, but please contact your domain name registrar to find out more. Log into your Heart Internet Customer Area and click on 'Transfer A Domain'. Enter in the domain names to transfer, one per line, without the www. Click on 'Start Transfer' to begin the process. Continue through to Checkout to ensure the process continues. Without checking out, the transfer will not proceed. Log back into your Heart Internet Customer Area to verify your domain has transferred.
