

Attach a Single-Purpose Voucher to products

Article Number: 1773 | Rating: 1/5 from 3 votes | Last Updated: Wed, May 12, 2021 at 4:37 PM

You can configure products to use designated single-purpose vouchers to offset 100% of the product's price. Follow the steps below to setup a product to be purchasable by voucher. **Required:** PDF Product Vouchers by SkyVerge is a premium WooCommerce extension included with WordPress Ecommerce Hosting or as a standalone purchase. Go to **Products** and select the product in question. In the **Redemption Vouchers** field, list the voucher template(s) that customers can use to buy this product. Click **Update**. **Note:**
â€¢ Please be aware that when working with a **single-purpose voucher**, the voucher will offset the **entire price of the redeemable product**, regardless of the voucher product's value. Be sure that your voucher product value matches the redemption product(s) value!

â€¢ We recommend ensuring that your single-purpose voucher uses the same **tax class** as the products it can be used on, since redeeming a single-purpose voucher will offset 100% of the product price, including tax.
