

Create a product to sell a Multi-Purpose Voucher

Article Number: 1778 | Rating: Unrated | Last Updated: Wed, May 12, 2021 at 4:40 PM

After creating a voucher template, you can attach it to a product. When customers buy this voucher product, they will generate a voucher to use on any redemption product(s). Follow the steps below to create a voucher product. **Required:** WooCommerce PDF Product Vouchers is a premium WooCommerce extension included with WordPress Ecommerce Hosting or as a standalone purchase. Go to **Products** and select the product in question, or click **Add new**. Check the **Has Voucher** box. Select your template from the **Voucher Template** field. **Note:** For **Variable products**, configure the **Has Voucher** and **Voucher Template** settings for each variation. The variation name will be included in the voucher's **Product Name** section. If your template doesn't include **Product Name**, we recommend adding **Product SKU** to the template and setting unique SKUs for each variation. Update the **Tax status** field to "None", as multi-purpose vouchers can be redeemed for any product. Click **Update**.
