

WooCommerce Subscriptions + PayPal: Transactions are showing as pending

Article Number: 1782 | Rating: Unrated | Last Updated: Wed, May 12, 2021 at 4:43 PM

PayPal transactions may show as pending causing a Subscription to not be activated since a payment has not fully processed. This may be a result of your store using a currency that is not a default currency used by the PayPal Sandbox.

Required: WooCommerce Subscriptions is a premium WooCommerce extension included with WordPress Ecommerce Hosting or as a standalone purchase. To accept payment using a non-default currency: Log in to your [PayPal Sandbox account](#) with your sandbox username and password. Click **Accept**. Choose **Accept this payment and create a balance in this currency**. • **Submit**.
