Step 2 of the Set up Intuit Payments series. Follow the steps below to connect the Intuit Payments plugin to your Intuit developer app: **Required:** Intuit Payments is a premium WooCommerce extension included with WordPress Ecommerce Hosting or as a standalone purchase. Navigate to **WooCommerce > Settings > Payments > Intuit Payments**. **Note:** Credit card and eCheck settings are configured separately. Select the payment method that you'd like to set up first, then you can repeat these steps for the other if you'd like to use both. Enter your **Client ID** and **Client Secret** under **Connection Settings**. Select **Save changes**. Select **Connect to QuickBooks**. Enter your Intuit credentials in the pop-up window to connect your account.
