Why am I getting a 'call to undefined function: mysql_connect()' error in my PHP script?

Article Number: 18 | Rating: Unrated | Last Updated: Thu, Apr 23, 2015 at 10:40 AM

If your script gives you a 'Call to undefined function: mysql_connect()' error, this is usually caused by unnecessary of directives in your custom php.ini file. This can happen when you have an extension_dir directive specified within your lift you remove that line in your file, it should resolve the problem. Often, using php.ini files found on other web servers an example on PHP programming websites can cause problems such as this. If removing the extension_dir directive problem, you should contact the script programmer, as this might suggest an issue with script.
