

Create a Products in Cart Cart Notice

Article Number: 1830 | Rating: Unrated | Last Updated: Wed, May 12, 2021 at 5:01 PM

When using the "Show Notice" Products option, the **Products in Cart** notice allows you to select one or more products to trigger the notice. When any of the selected products is in the cart, the notice is shown. The {products} variable may be used in the Notice Message body to display the name of the product in the cart, from list of matching products you've set. The "Hide Notice" Products option allows you to select one or more products that will hide the notice when in the cart. Once any product from the list is added, the notice is removed. **Required:** WooCommerce Cart Notices is a premium WooCommerce extension included with WordPress Ecommerce Hosting or as a standalone purchase. A **Products in Cart** Cart Notice can be created by: Go to **WooCommerce > Cart Notices**. Select the **New Notice** tab. Select **Products in Cart** from the **Type** menu. Enter a name for the notice in the **Name** field. Select the checkbox next to **Enable** to enable or disable a notice for display. Create your custom **Notice Message**. A basic notice is provided to get you started, as well as the variables related to the notice type. Enter **Call to Action** text (optional) - This text will be rendered next to the cart notice. Enter a **Call to Action URL** (optional) - This specifies where the user will go upon clicking the Call to Action button. To show the notice if any selected product is in the cart: Add all the products you wish to show in the "**Show Notice**" **Products** field. To hide the notice if any selected product is in the cart: Add all the products you wish to hide in the "**Hide Notice**" **Products** field. Select the **Create Cart Notice** button.
