

Create a Referrer Cart Notice

Article Number: 1832 | Rating: Unrated | Last Updated: Wed, May 12, 2021 at 5:01 PM

The Referrer Cart is the server the customer must have originated from in order to display this message. For instance, if you set this value to 'www.google.com' your notice will be displayed to all traffic originating from Google **Required:** WooCommerce Cart Notices is a premium WooCommerce extension included with WordPress Ecommerce Hosting or as a standalone purchase. A Referrer Cart Notice can be created by: Go to **WooCommerce > Cart Notices**. Select the **New Notice** tab. Select **Referrer** from the **Type** menu. Enter a name for the notice in the **Name** field. Select the checkbox next to **Enable** to enable or disable a notice for display. Create your custom **Notice Message**. A basic notice is provided to get you started, as well as the variables related to the notice type. Enter **Call to Action** text (optional) - This text will be rendered next to the cart notice. Enter a **Call to Action URL** (optional) - This specifies where the user will go upon clicking the Call to Action button. To show the notice when the visitor originates from a specific site, enter the sites URL in the **Referring Site** field. Select the **Create Cart Notice** button.
