

## How do I transfer my .uk domain name away to a new host?

Article Number: 184 | Rating: 2.6/5 from 10 votes | Last Updated: Tue, Jul 20, 2021 at 8:53 AM

Transferring your .uk domain to a new host is very easy. You simply need to change the Nominet IPSTAG for your domain to the one provided by your new host. Make certain you have it absolutely correct, because entering in the wrong IPSTAG could result in you losing control of your domain name. You will also need to check your current contact details for this domain, as well as disabling domain privacy, so the new registrar can contact you. Log into your Customer Area Click 'Manage Domain Names' Click the link under 'List Your Domains' Click the 'Manage' link for the domain you wish to edit Click 'Domain Locking' If the domain is locked, select "Click Here" to unlock this domain" Go back to 'Manage Domain' Click 'Change Nominet Tag' Confirm that you want to change the Nominet tag Enter in the new tag Click 'Change Nominet Tag' Your IPSTAG will be changed Nominet will update your domain and transfer the domain in
