

## **Are there restrictions on the domain types you can host?**

Article Number: 192 | Rating: 1/5 from 5 votes | Last Updated: Thu, Apr 23, 2015 at 11:16 AM

At this moment, we only support the most commonly used domain types to ensure that our service levels remain exceptionally high. We support all .uk domains, all CentralNIC domains such as .uk.com, and many of the generic top-level domains (gTLDs) such as .com, .org, and .net. These domain types make up most of the domain names used within the United Kingdom. If we do not support the domain you want to use, you can create a domain reference in your Heart Internet account to have your web hosting with us even if you cannot transfer the domain in.
