

What does FQDN mean?

Article Number: 193 | Rating: 1/5 from 3 votes | Last Updated: Thu, Apr 23, 2015 at 11:16 AM

FQDN means Fully Qualified Domain Name. It is also sometimes referred to as an absolute domain name. This is a complete domain name, with a host, all domain levels, and the top-level domain. For example, in `www.your-domain.co.uk`: **www** is the host **your-domain** is the third-level domain **co** is the second-level domain **uk** is the top-level domain The FQDN specifies exactly where your domain sits within the domain hierarchy. No other domain name can have its exact same information.
