

cPanel - Domains & Website Setup - Setting up additional domains

Article Number: 1943 | Rating: Unrated | Last Updated: Wed, Jan 21, 2026 at 8:43 PM

To add additional domains to your Managed WordPress hosting, first navigate to the Manage Managed WordPress section in your Heart Internet account and use the Login/Access button to access the Managed WordPress dashboard. Â Once logged in, on the top right corner of the screen you will have the option to â€œCreate New Siteâ€•. Â Once clicked, you will be presented with a new page with 2 main options: Choose a domain later : this option allow you to start creating a site without an active domain name, much like a staging site Use a domain that you own : this option allow you to add an existing domain to the Managed WordPress package. To note, for the full setup to be completed, the domain you are adding will need to be using our Name Servers. **Once an option is selected, press continue.** Â You will then need to select one of the 2 installation options available. The Walk Me Through option will an AI system and your input to generate a customized site while the Start with Settings is a more standard WordPress install which will create a blank, standard WordPress site which will need to be manually customized.Â
