

Can I connect to a MS-SQL database from my Linux hosting account?

Article Number: 2 | Rating: 1/5 from 1 votes | Last Updated: Wed, Apr 29, 2015 at 9:04 AM

If you want to connect from your Linux hosting account or server to your Microsoft SQL (MS-SQL) database, you need to write a script in PHP5 that uses the MSSQL module. You can find the directives available and the values for them in your eXtend Control Panel under 'Perls & PHP Module List' in 'Website Help & Diagnostics'. For more information on the MSSQL module, please visit the PHP website:Â <http://php.net/manual/en/book.mssql.php>.
