

How do I increase the MAX_JOIN_Size when my script gives an error about it being too low?

Article Number: 21 | Rating: 1/5 from 1 votes | Last Updated: Thu, Apr 23, 2015 at 10:39 AM

MySQL will not execute select statements that directly examine a very large number of rows.Â Either adjust your se
it more efficient, such as using index fields instead, or set SQL_BIG_SELECTS=1 in the session before executing th
set the SQL_BIG_SELECTS=1, use the following code: \$db->sql_query(â€œSET SQL_BIG_SELECTS=1â€•);
