

Can I connect to my mailbox with a secure connection?

Article Number: 260 | Rating: 2.3/5 from 4 votes | Last Updated: Thu, Apr 23, 2015 at 11:34 AM

We do support SSL encryption for all mail connection protocols. If you are using our webmail at www.outitgoes.com, you can access a secure version via <https://www.outitgoes.com>. If you are connecting to your mailbox through a desktop-based email client, the ports are: POP3: 995 IMAP: 993 SMTP: 465 Be certain to tick the option in your mail client to use secure password authentication when using a secure connection. You may receive a warning when making a secure connection to your mailbox.Â This is a common warning, and you can accept the certificate permanently despite the warning.
