Can I override the icons or background images shown in my eXtend Control Panel?

Article Number: 269 | Rating: 1/5 from 4 votes | Last Updated: Thu, Apr 23, 2015 at 11:47 AM
You can customise your eXtend theme if you are a Reseller. The eXtend Control Panel is designed to be configured possible through the CSS, including background, colours, and icons. To access the eXtend customisation area: Log Reseller Control Centre Click ‘eXtend Themes’ Click ‘Advanced Settings’ Under ‘Upload CSS File and Preview’, ente revised CSS Click ‘Apply Brand’ In the CSS, if you override the background image of an icon, it will change the look your customers.Â For example, if you want to change the icon for all documents, you would add the following CSS l {background: url(http://www.your-domain.com/images/document-icon.gif);} This will change all the document icons to document icon. If you view the source of your customer’s eXtend Control Panel, you will be able to see which CSS ru to add.Â
