Can I change the language in the eXtend Control Panel for my customers in other countries?

Article Number: 273 | Rating: 1/5 from 7 votes | Last Updated: Thu, Apr 23, 2015 at 11:52 AM
We currently do not have an automated system that would allow Resellers to translate the eXtend Control Panel fully You can, however, override the icons in eXtend, and use that particular language in your icons. This changes the ico customers' control panel, so it is only appropriate if you supply hosting for only a single language group. To change t customers' eXtend control panel: Log into your Reseller Control Centre Click 'eXtend Themes' Click 'Advanced Sett CSS File and Preview', enter in your revised CSS Click 'Apply Brand' If you view the source of your customer's eXte be able to see which CSS rules you need to add. You can also provide your customers with Google Translate for the Log into your Reseller Control Centre Click 'Configure eXtend' Tick the checkbox for Google Translate enabled Click eXtend control panels will now have the option to be translated via Google Translate
