Can I use File eXchange Protocol (FXP) for site-to-site transfers?

Article Number: 299 | Rating: Unrated | Last Updated: Thu, Apr 23, 2015 at 12:33 PM

File eXchange Protocol (FXP) is a way to transfer data from server to server without routing through the client. FXP can be exploited by hackers to perform denial-of-service (DoS) attacks on servers. To protect our customers and our servers, we do not allow FXP to be used.Â
