You can set up multiple IP addresses to have permanent access to your FTP without a time limit. Log into your eXtend Control Panel Go to the Unlock FTP bar on the side panel Under Unlock by IP, enter in the IP addresses separated by a comma Click 'Unlock' The IP addresses will now have access It is not possible to unlock FTP for a DNS address. The FTP server cannot authenticate the DNS address against the information passed via your FTP client, and therefore cannot confirm that you are coming from the correct address.
