

How do I log into MySQL as the root user on my Plesk server?

Article Number: 31 | Rating: 1/5 from 3 votes | Last Updated: Wed, Aug 18, 2021 at 2:16 PM

Versions 10 and higher of Plesk have the administration password encrypted on the server. As a result, if you do not know the password, you cannot log into the MySQL database with administration powers. However, you can get the administration password from a command line: `/usr/local/psa/bin/admin --show-password` And now that you know the password, you can log into MySQL with root administration privileges on any version of Plesk with this command line: `mysql -uadmin -p'cat /etc/psa/.psa.shadow'` This command gives you access to the MySQL database on the server.
