As a Reseller, you can add a Domain Control Panel, eXtend Control Panel, or WebMail to any of your domain names or add them as subdomains on every domain name you host, or select a particular domain name and create the subdomain. If you wanted to set up subdomains on all your customers' accounts, a customer with the domain name of your-domain.com could have a webmail.your-domain.com eXtend Control Panel: extend.your-domain.com Domain Control Panel: domain.your-domain.com. If you access subdomains on one of your domains, it could be: WebMail: webmail.hostingcontrol.com eXtend Control Panel: extend.hostingcontrol.com Domain Control Panel: domain.hostingcontrol.com To set up a subdomain for the eXtend Control Panel: Log into your Reseller Control Centre 'Reseller Preferences' Enter in the name of the subdomain you wish to use under 'Control Panel Web Address' Select whether you want it to apply to all domains or only a particular domain Click 'Update Now' The subdomain will now be generated and host the eXtend Control Panel: Log into your Reseller Control Centre Click 'Domain Control Panel' under 'Manage Domain Names' Enter the name of the subdomain you wish to use under 'Control Panel Web Address' Select whether you want it to apply to all domains or only a particular domain Click 'Update Now' The subdomain will now be generated and host the Domain Control Panel To set up a subdomain for WebMail: Log into your Reseller Control Centre 'Reseller Preferences' Enter the name of the subdomain you wish to use under 'Configure Personalised Webmail' Select whether you want it to apply to all domains or only a particular domain Click 'Update Now' The subdomain will now be generated and host the Webmail. you can also direct your customers to the following URLs: eXtend Control Panel: www.extendcp.co.uk Domain Control Panel: www.outitgoes.com WebMail: www.outitgoes.com To log into the subdomains or URLs, your customers will need their domain name (or
