What is the server path?

Article Number: 402 | Rating: 2.8/5 from 4 votes | Last Updated: Thu, Apr 23, 2015 at 12:13 PM

The server path to your website is partially determined by your domain name, but if you are on a shared hosting package, it will always be in the following format: /home/sites/your-domain-name.com/public_html If you are using PHP, you can also find out this path by including the following code into a PHP script: echo getcwd();
