Do CGI or Perl scripts have to be in a specific directory?

Article Number: 409 | Rating: 1/5 from 2 votes | Last Updated: Thu, Apr 23, 2015 at 12:27 PM
While we provide a cgi-bin as standard for storing your CGI or Perl scripts, you do not need to put your scripts there. You cannot create a new cgi-bin, but you can put your CGI or Perl scripts into any directory as long as they have a .cgi or .pl extension.
