

Can I change the maximum file upload and timeout settings for PHP?

Article Number: 420 | Rating: 1.5/5 from 6 votes | Last Updated: Thu, Apr 23, 2015 at 12:19 PM

You can change the maximum file upload and timeout settings in PHP: Create a php.ini (or php4.ini if you are using PHP4) file in your text editor Paste the following code into the file: `upload_max_filesize = [SIZE] ;`
`post_max_size = [SIZE] ;`
`max_execution_time = [TIME] ;` Change [SIZE] to the file size you want to be able to upload (such as 20M) Change [TIME] to the length of time you want have (such as 60) Upload the file to your directory You will now have the file size and time length changed to your specifications For example, if you upload: `upload_max_filesize = 20M ;`
`post_max_size = 20M ;`
`max_execution_time = 60 ;` You would have a maximum file size of 20mb and it would be 60 seconds before the process timed out.
